Publisher's PDF, also known as Version of record

Please check the document version of this publication:

- A submitted manuscript is the version of the article upon submission and before peer-review. There can be important differences between the submitted version and the official published version of record. People interested in the research are advised to contact the author for the final version of the publication, or visit the DOI to the publisher's website.
- The final author version and the galley proof are versions of the publication after peer review.
- The final published version features the final layout of the paper including the volume, issue and page numbers.

Enhanced Separation in Ambient Mass Spectrometry Imaging

Towards quantification of pharmaceuticals

By Lieke Lamont-de Vries, 28th January 2021

1. Challenges in quantitative MSI (Q-MSI) of pharmaceutical compounds are often the result of limited separation prior to MS analysis. – This thesis
2. From a biological point of view, this isomeric separation is crucial in the study of the different metabolic pathways of prostanoids. – This thesis
3. Not only is DESI-MRM imaging more selective but also significantly reduces analysis costs relative to high mass resolving MS imaging of isobars; which can be an argument for implementation in the pharmaceutical industry. – This thesis
4. Although the use of MRM is already standard practice in the pharmaceutical industry for decades, this is not the case for pharmaceutical MSI. – This thesis
5. The impact of MSI on the pharmaceutical pipeline is indispensable which explains the broad interest from major pharmaceutical companies. – This thesis, valorization
6. Reserve your right to think, for even to think wrongly is better than not to think at all. - Hypatia
7. Science and everyday life cannot and should not be separated. – Rosalind Franklin
8. Like what you do, and then you will do your best. – Katherine Johnson
9. Nanakorobi yaoki. Fall seven times and stand up eight. Als je zeven keer valt, sta je acht keer op. – Japanese proverb
